

# Optimum Hardware and Software Requirements for the Book:

<b>Software Required (With version)</b>	Ansible 2.1+ (although any version might work). Node.js 6.x+, Docker 1.12+ (Community Edition), Python 2.6+ (not 3), Atom (the editor, any version).
<b>Hardware Specifications</b>	Any hardware would work as the majority of examples are running in Google Cloud Platform using the free trial.
<b>OS Required</b>	Examples are tested in Linux and macOS but they also work on Windows so... any OS.
